SUMMARY

Data analyst with an M.Sc. in Big Data & Business Analytics (grade 1.9) and 5 years of software quality assurance experience. Uses SQL, Python and Power BI for data cleaning, analysis, KPI reporting, dashboards and predictive modelling, and brings a tester's discipline to data validation, root cause analysis and data quality. Experienced in Agile/Scrum teams and in aligning business and technical stakeholders.

TECHNICAL SKILLS

Analytics & BI: Power BI (dashboards, data visualisation, basic DAX), Microsoft Excel, KPI reporting, dashboard development
Data & Programming: SQL (MySQL, SQLite; CTEs, window functions), Python (pandas, NumPy, scikit-learn, XGBoost, NLTK, Matplotlib, seaborn), Jupyter, ETL, data cleaning, EDA, web scraping
Statistics & ML: Regression, classification, clustering, NLP (sentiment analysis, TF-IDF), hypothesis testing (t-test, ANOVA), cross-validation
Data Quality: Data validation, data quality checks, root cause analysis, error analysis, defect tracking, process quality
QA & Delivery: Test automation (Tricentis Tosca), functional and regression testing, test cases, Jira, Agile/Scrum

PROFESSIONAL EXPERIENCE

Operations Associate — Flink (quick-commerce grocery delivery)
12/2024 – present | Essen, Germany | alongside M.Sc. studies

- Support daily dark-store operations (order picking, packing, stock handling) against fast delivery-time targets, gaining first-hand knowledge of fulfilment and inventory KPIs.

Senior QA Engineer — RMSI Pvt Ltd
02/2021 – 01/2024 | India

- Reduced repeat defects by 20% by analysing recurring issues, documenting root causes and coordinating fixes with client and development teams.
- Identified 90% of defects before go-live through functional and regression testing after system changes.
- Accelerated defect triage by 15% by tracking issues in ART (defect tracking tool) and presenting defect trend analysis in Agile reviews.

Trainee – Software Quality Assurance — Lince Soft Solutions Pvt Ltd
11/2018 – 01/2021 | India

- Executed manual and automated test cases for web and mobile applications; analysed application metrics and logs to identify performance and usage trends.

DATA PROJECTS

Master's Thesis: Airline Customer Satisfaction & Operational Performance (Python, scikit-learn, XGBoost, NLTK)

- Scraped 7,555 customer reviews and analysed 570,550 flight records; adding sentiment and text features raised recommendation-prediction accuracy from 91.6% to 93.3% (ROC AUC 0.98) and cut misclassifications by 20%.

Bank Marketing Subscription Prediction (Python, scikit-learn, SciPy)

- Built leakage-free models on 41,000+ campaign records; ranking customers by model score reaches 66% of subscribers in the top 20% of calls, a 3.3x lift over random calling (ROC AUC 0.81).

Medical Insurance Cost Prediction (Python, scikit-learn, XGBoost)

- Predicted costs for 100,000 policyholders with 64 engineered features; Random Forest reached R^2 0.95 (MAPE 13.3%).

Operations Data Quality & KPI Pipeline (SQL, Python, unit tests, GitHub Actions)

- Built a reproducible pipeline that validates 1,200 delivery orders, quarantines failing rows with a line-level audit trail, and calculates on-time, cancellation and revenue KPIs per hub in SQL (CTEs, window functions).

EDUCATION

M.Sc. Big Data & Business Analytics — FOM University of Applied Sciences, Essen
2024 – 2026 | Final grade: 1.9 | Focus: data analysis, machine learning, Python, big data technologies, agile project management

B.Tech Electronics & Communication Engineering — Priyadarshini Institute of Technology & Science
2014 – 2018 | India | Final grade: 7.3/10

CERTIFICATIONS

- **Deloitte Australia – Data Analytics Job Simulation** — Deloitte, 10/2026 (Tableau, data analysis); Credential ID 6addd9d4d4a81158c301ae4c
- **FMEA International Basic Requirements and Standard** (Failure Mode and Effects Analysis) — Stephan Schröder, 05/2025
